SUMMARY

I am a detail-oriented technology enthusiast with skills in Azure DevOps, Git version control, Python, C++, and React.js. I enjoy building and troubleshooting full-stack applications, working across both frontend and backend. With a BCA in Computer Science and internship experience at M-squared, I have gained hands-on exposure to modern development workflows. I am particularly interested in DevOps practices and cloud technologies, and I am eager to grow my expertise in automation, CI/CD pipelines, and scalable cloud-based solutions. Outside of work, I enjoy drawing, music, and reading.

WORK EXPERIENCE

Internship- M-squared, Ernakulam

Python and React J.S Intern

- Developing and troubleshooting web applications using Python for backend logic and React.js for interactive frontend interfaces.
 - I collaborated with the team to debug issues, optimize performance, and ensure seamless integration between the frontend and backend components.
-

PROJECTS COMPLETED

Deployed My First CI/CD Static Website on GitHub Pages. DevOps Skills in Action – Shows the full code to-live pipeline: version control, CI/CD, build steps, and real-time hosting via GitHub Pages.

Check it out live: https://lnkd.in/evB_zCpF

CiniRev – Movie Review & Recommendation App

Built a full-stack application using Flutter, FastAPI, and PostgreSQL enabling users to browse, review, and track movies, with a personalized recommendation system using the Apriori algorithm.
